

We're pleased that you were able to attend CranioSacral Therapy I held in Chicago. We hope it was a rewarding experience and that you are finding the techniques helpful in your practice. Enclosed is a class roster, additional workshop information, and a certificate of attendance that may be used for submission to your state licensing board (if applicable for your license requirements). Please call us for the appropriate provider number to complete the certificate.

As you may know, your attendance at this workshop qualifies you to be listed in the International Association of Healthcare Practitioners (IAHP) online directory. If you would like to receive information on the benefits and related costs of membership, or prefer not to be listed, please let us know.

Now that you have completed CSI, we thought you might be interested in learning more about the next course. CranioSacral Therapy II provides a more expansive understanding of the dynamics of the craniosacral system and its function in relationship to other patho-physiological body systems. You will learn specific techniques for treating dysfunctions of the Temporomandibular Joint (TMJ) and Hard Palate and for evaluating the health of infants and children.

As a prerequisite to this course, we suggest that you utilize the skills learned in CSI for approximately three months. This offers a forum to ask questions, watch demonstrations by experts in the field, and practice the subtleties of the technique to enhance your effectiveness in the work. Feel free to call us toll-free at 1 800 233-5880 for additional details on CSII workshops, CSI Review classes, or study groups in your area.

We will update you throughout the year and you may also visit us at www.upledger.com for the most recent developments. We hope that you will continue to provide us with feedback as it enables us to offer the very best learning experience possible. Please feel free to contact us with your comments.

Sincerely,

The Upledger Staff
